

ADAXIS Architects Opens Wasatch County Branch Office

11-4-98

Thomas Dale Kerby

11-4-98

Thomas Dale Kerby, architect and principal with ADAXIS Architects, has accepted a temporary assignment in Wasatch County and announced recently that he will be opening a branch office in Daniels Canyon. He will spend from three to five days weekly at Daniel Canyon.

Mr. Kerby, formerly a principal and owner of CCDR, was project architect for the Fine Arts Museum at BYU, prepared the masterplan for the car rental service center and designed the Hertz and Alamo facilities at the Salt Lake International airport.

Other projects include: Headquarters and satellite fire station buildings for Sandy; numerous religious facilities; and a communications building for US West. He is currently working on several office/condominium projects popular in the Provo and Salt Lake City areas.

Mr. Kerby has ties to Wasatch county: his father, the late Joe M. Kerby, was born in Midway, his grandmother, Patti Goodwin, was born in Center Creek, and his great-great-grandfather, Francis Kerby, was the first Bishop in Wallsburg.

He is looking forward to his assignment and getting to know more people in Wasatch County.

Chamber Welcomes New Business

George Olson, architect, accepts the traditional planter presented to new members of the Heber Valley Chamber of Commerce from Johnny Wetsel, representing the Chamber. Behind them is one of Mr. Olson's best known local projects, the Chamber's Heritage Hall and Visitor Center. "I specialize in themed and resort architecture, whether it be Swiss alpine, English, or whatever the client wants. If I go into a resort town, I'll do everything from dwellings to commercial shops, to city buildings," said Mr. Olson. He designed the renovation of the Heber City office building; the first phase of Swiss Oaks, in Midway; Midway City Hall; Inn on the Creek and the Burgermeister in Midway; the new LDS Midway Stake Center; Seven Peaks Water Park, and the Alpine terminals on the world's longest gondola, in Kellogg, ID. He has worked on eight major ski resorts across the country and designed many private homes. Mr. Olson is certified by the National Council of Architectural Registration Board, a testing organization. His office is at 101 West Main St., Midway, 654-3725.
